

Wrap™
JamesHardie

The new standard in weather barriers. From America's #1 brand of siding.

Over 4 million homes in North America are protected by James Hardie® siding products, a testament to the confidence homeowners have in our products. With the HardieWrap™ weather barrier, you know your home is covered by the toughest, most weather- and water-resistant barrier available, one that delivers real protection against the weather, no matter what type of exterior product you choose. It's what you'd expect from a name you can trust—James Hardie.

A better home starts with a better weather barrier.

A home protected by HardieWrap weather barrier adds real value for its owner. It increases your home's energy efficiency, so it's less costly to heat in the winter and keep cool in the summer. Most important, it provides a safer, more secure living environment for you and your family, even under extreme weather and climate conditions.

A Better Way To Build™

It's not just a house. It's your home.

With the HardieWrap™ weather barrier, you'll have peace of mind knowing your home and family are protected by a higher performing weather barrier. And that's important. Because your second line of defense is also your last line of protection against the elements.

Built by the best for the best.

While the HardieWrap weather barrier is built to last, even the best product is only as good as the people who install it. James Hardie offers a wide range of support services to ensure Best Practices Installation. When correctly installed, HardieWrap weather barrier solution provides unmatched protection against the weather.

For comprehensive installation requirements, product information, warranty and support, visit www.hardiewrap.com or call us at 1-866-4-HARDIE (1-866-442-7343).

HardieWrap™

The best-built homes have HardieWrap™ written all over them.

Two lines of defense are better than one.

James Hardie started it all with HardiePlank™ lap siding, the first line of defense against the weather. But regardless of the climate, you want extra protection. New HardieWrap™ weather barrier gives you a second line of defense against the weather. Whether you're building a new home or putting on an addition, you want the superior quality and performance of HardieWrap weather barrier to provide protection for your home.

Technology makes the difference.

HardieWrap™ weather barrier features a unique MicroTech™ Coating that enables higher performance. The extra thickness of the HardieWrap weather barrier also provides superior tear resistance during installation.

HardieWrap weather barrier provides a balance of water resistance and breathability, allowing moisture from inside your home to escape so the area within the wall stays dry.

- **Water Resistance**
Protects your home from water damage, even during severe storms
- **Breathability**
Helps prevent the conditions for mildew
- **Air Penetration Resistance**
Reduces energy loss to save you money

Wrapping a home with a continuous air barrier like HardieWrap™ weather barrier reduces air leaks saving energy and protecting the environment.

A complete solution to protect your home.

When properly installed under any type of exterior, HardieWrap™ weather barrier solution gives your home an unmatched double line of defense against water damage, mildew and energy loss.

A complete HardieWrap™ weather barrier solution¹ includes:

- HardieWrap weather barrier
- HardieWrap™ Flashing
- HardieWrap™ Flex Flashing
